Research & Development Capabilities

Design
Machining
Fabrication
Electrical Controls
Prototyping

Contract Machining

One piece to medium production lots

CNC Machining Capabilities

Turning up to 28" dia. x 120" length
Vertical Machining Centers -X=51", Y=33",
Z=28" (maximum)
OD Grinding up to 12" dia. x 36" length

Conventional Grinding

Blanchard - 42" Chuck
Surface Grinding - 12" x 24" Chuck

Conventional Machining

Sawing - 12" dia. capacity
Engine Lathe Turning
Bridgeport Milling
Straightening Press

Welding & Sheet Metal Fabrication Capabilities

Sand Blasting & Powder Coating Capabilities

Design upgrades; retrofitting; and
rebuilt of select older machine tools
